THE VALLEY CLUB OF MONTECITO
SANTA BARBARA CALIFORNIA P. O. Box 1140

Dear Dr. Mason -

Truly I am distressed to hear the Reef Point herbarium sheets were found infected by evil insects. May I be allowed to re-imburse the university for the cost of fumigating? It is essential to hear you present the sheets will present.

We know we are lacking in many species, & are short of *Tenues*, *Agrostis*, & *Carex* - Do you wish them collected if it be possible?

Please give friendliest regards to my old friend dadyard Stebbins, when next you see him.

It is a pleasure to know that the Reef Point sheets & cases will be of use.

With kind regards I am

Yours very truly,

Frederic Farrand
